Mon Site Professionnel

Scientific baseground in the field of Physic and Chemistry with firsts professionals experiences into the energy for industry from boilers to generate heat and/or electricity. Presently located south-est of France, aiming the nuclear power plant Industry, right next to ITER project.

EXPERIENCES

Consultant

SEELEX - February 2023 to October 2026 - Gréoux-les-Bains – France

Intervention in Morocco, Guiana, Nevers then in Alsace for diverse industrials projects

Administrative and field support

CEA - April 2022 to nowadays - CDD-Saint-Paul Lez Durance – France

Administrative and technical support onto experimental research facilities related to nuclear boilers. Experimental loop scale 1 with primary grid WPR conditions, 320°C and 155 bars

Scientific / commissioning engineer

Cegelec Projet Espace - June 2021 to September 2021 - CDD-Kourou – Guiana

Operational support for the commissioning of helium and nitrogen grids into the ELA 4 project, the new spatial launch station for Ariane 6 at the Guiana Space Center

Teacher Physic & Chemistry

Academy of Guiana - January 2021 - CDD-Saint-Laurent du Maroni – Guiana

Educational support in physic and chemistry for secondary school students attending classes at LPO Lumina Sophie

Commissioning engineer/technician

Compte-R - August 2020 to December 2020 - CDI-Arlanc - France

Commissioning of industrial wood pellets boilers (2x2,5 MWth) in Harlow, England,and training of operators, support for maintenance, after-sale and commissioning in France

Commissioning assistant

CNIM - January 2020 to March 2020 - CDIC - Le moule - Guadeloupe - France

Following and reporting commissioning status of two flue gas desulfurization system in line with coal boilers of 30MWth each and support for the commissioning team on the field

Field manager

TEREOS - Mai 2019 to September 2019 - CDD - Compiegne - France

Customer representative on the field for a gas boiler (2x11MWth) project with steam production, handling from civil works till commissioning

After-sales field engineer

John Cockerill - June 2018 to September 2018 - CDI - Seraing - Belgium

Replacement of blanket panels from two heat recovery steam generator (40 meters high) from combined cycle power plant of EDF in Martigues, 930 MWe in total

Assistant supervisor

Leroux et Lotz - July 2017 to September 2017 - CDIC - Le mans – France

Revamping on two lines of Waste to Energy (WtE) incinerators (2x14MWth) of the flue gas heating system for Selective Catalytic Reduction (SCR)

International Field Supervisor/Engineer

Vyncke - November 2013 to June 2017 - CDI - Kortrijk - Belgium

It has been a rich experience on the field along different steps of biomass boiler project with the erections, commissioning's, tunings, maintenances, trouble-shootings... This has brought and strengthened communications and technicals skills

Trainee

WEISS France - Mach 2013 to August 2013 - Training - Ugine - France

Assisting the combustion senior/expert within industrial biomass boilers business

EDUCATION / DEGREE

Master 2 Renewables and New Energies

UFR Sciences et techniques September 2012 to September 2013 -Nantes - France

Master 1 Physics and Chemistry

UFR Sciences et techniques Septembre 2006 à Septembre 2012 -Nantes - France

Skills

Authorization

Safety : VCA
Electric : LT
Nuclear : PR 1 CR

Languages

French : Native
English : Fluent
Portuguese : Fluent
Dutch : available
German : available
Spanish : available

HOBBIES

Bike, Swimming, Fitness
Classical Guitar
Writing
